EDUCATION

Vellore Institute of Technology, India **2023 - 2027**
B.Tech. in Computer Science Engineering Specialization in Cloud Computing and Automation **CGPA: 8.68/10**

TECHNICAL SKILLS

Languages	Java, Python, JavaScript, TypeScript, SQL
Frontend	React.js, HTML, CSS, Tailwind CSS
Backend	Node.js, Express.js, REST APIs, FastAPI
Databases	MongoDB, PostgreSQL, MySQL, Redis
AI/ML	LLMs, Gen AI, Gemini API, RAG, LangChain, LangGraph, AI Agents
Developer Tools	Git, GitHub, AWS, Postman
Core Concepts	Object-Oriented Programming, System Design, DBMS, Operating Systems

EXPERIENCE

Codveda Technologies: WEB DEVELOPMENT INTERN **May 2026 - June 2026**
MongoDB, Express.js, React.js, Node.js, REST APIs

- Developed responsive full-stack web applications using the MERN stack, focusing on scalable frontend and backend functionality.
- Built RESTful APIs and CRUD operations with Node.js and Express.js, integrating MongoDB for efficient data storage and retrieval.
- Optimized React components and backend operations to improve application performance, maintainability, and overall user experience.

PROJECTS

CloudShield — Cloud Security Posture Management Platform **[GitHub]**
React, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, AWS

- Developed a CSPM platform to monitor cloud resources, assess security posture, and identify security risks.
- Implemented REST APIs with JWT authentication, RBAC, security findings, and remediation workflows for centralized cloud security management.
- Built an interactive dashboard to visualize security scores, resource health, findings, and remediation status for faster risk identification.

Interviewly AI — AI Job Preparation Platform **[GitHub]**
React.js, Node.js, Express.js, MongoDB, Gemini API, Puppeteer

- Built an AI-driven platform for personalized interview preparation and job-specific candidate assessment.
- Used Gemini AI to analyze job descriptions and candidate profiles, identify skill gaps, and generate tailored interview scenarios.
- Automated ATS-friendly resume generation with Puppeteer, enabling customized resumes directly from the platform.

Kavach — Zero-Trust Runtime Security for Autonomous Systems **[GitHub]**
React, Node.js, FastAPI, AWS, Docker, Bedrock, Step Functions, Fargate

- Developed a zero-trust security platform for multi-agent AI systems with pre-execution artifact scanning and runtime authorization.
- Built a deterministic security pipeline using Semgrep, Bandit, pip-audit, Gitleaks, and isolated Fargate sandboxes to detect and block malicious artifacts.
- Implemented agent identity, capability-based access control, Cedar policies, quarantine, and real-time security telemetry for autonomous workflows.

PROFESSIONAL DEVELOPMENT & CERTIFICATIONS

- IBM DevOps, Agile & Design Thinking Certification
- Gen AI Fundamentals - Tutedude
