OBJECTIVE

I am a Computer Science Engineering student interested in application development, AI/ML, and emerging technologies. I enjoy building practical solutions, exploring new technologies, and solving real-world problems through projects and hackathons. I am a quick learner who enjoys working in collaborative environments and continuously improving my technical skills.

EDUCATION

Bachelor of Technology (B.Tech)

Computer Science Engineering Specialization in Cloud Computing and Automation

Vellore Institute of Technology, Bhopal

CGPA - 8.68/10

2023 - 2027

SKILLS

Technical Skills Java, C++, C, Python, HTML, CSS, Tailwind CSS, JavaScript, React.js, Node.js
Express.js, Spring Boot, SQL, REST API, Git, GitHub

Concepts Object-Oriented Programming, Computer Networks, Operating Systems

EXPERIENCE

Codveda Technologies: WEB DEVELOPMENT INTERN

May 2026 - June 2026

Built responsive full-stack web applications using A high-performance MERN stack application engineered for enterprise-grade scalability and refined visual engagement. Developed RESTful APIs, CRUD functionality, MongoDB integration, and server-side logic using Node.js and Express.js, while optimizing React components and database performance through clean and maintainable coding practices.

PROJECTS

Grade Change Intelligence in Paper Making Process

Developed a full-stack AI-based Grade Change Intelligence system using Python, Random Forest, FastAPI, and React to predict Basis Weight deviations during paper grade transitions. The solution provides explainable recommendations, process correlation analysis, interactive dashboards, and operator feedback tracking, achieving 95% prediction accuracy for proactive process optimization.

SpendSense — Personal Finance Intelligence System

Created SpendSense to simplify personal financial management and turn transaction data into meaningful spending insights. Built a MERN-based platform with secure authentication, budget and recurring transaction management, automated analytics, CSV import/export, and interactive visualizations. Delivered a responsive, fully deployed application that enables users to better understand spending patterns and make informed financial decisions.

Library Management System

Designed and implemented a Library Management System using C, ASP.NET, SQL Server, HTML, CSS, and JavaScript to streamline library workflows. Integrated user authentication, book inventory, issue/return records, role-based access, and CRUD operations with a structured database and responsive web interface.

PROFESSIONAL DEVELOPMENT CERTIFICATIONS

- IBM DevOps, Agile Design Thinking certification
- Google IT Support Professional Certificate
- Gen AI Fundamentals – Tutedude (Ongoing, 2026)
